

“Certified VET trainer in the construction sector”

CertiVet

Models for validation and certification of qualifications Trainer VET in Romania

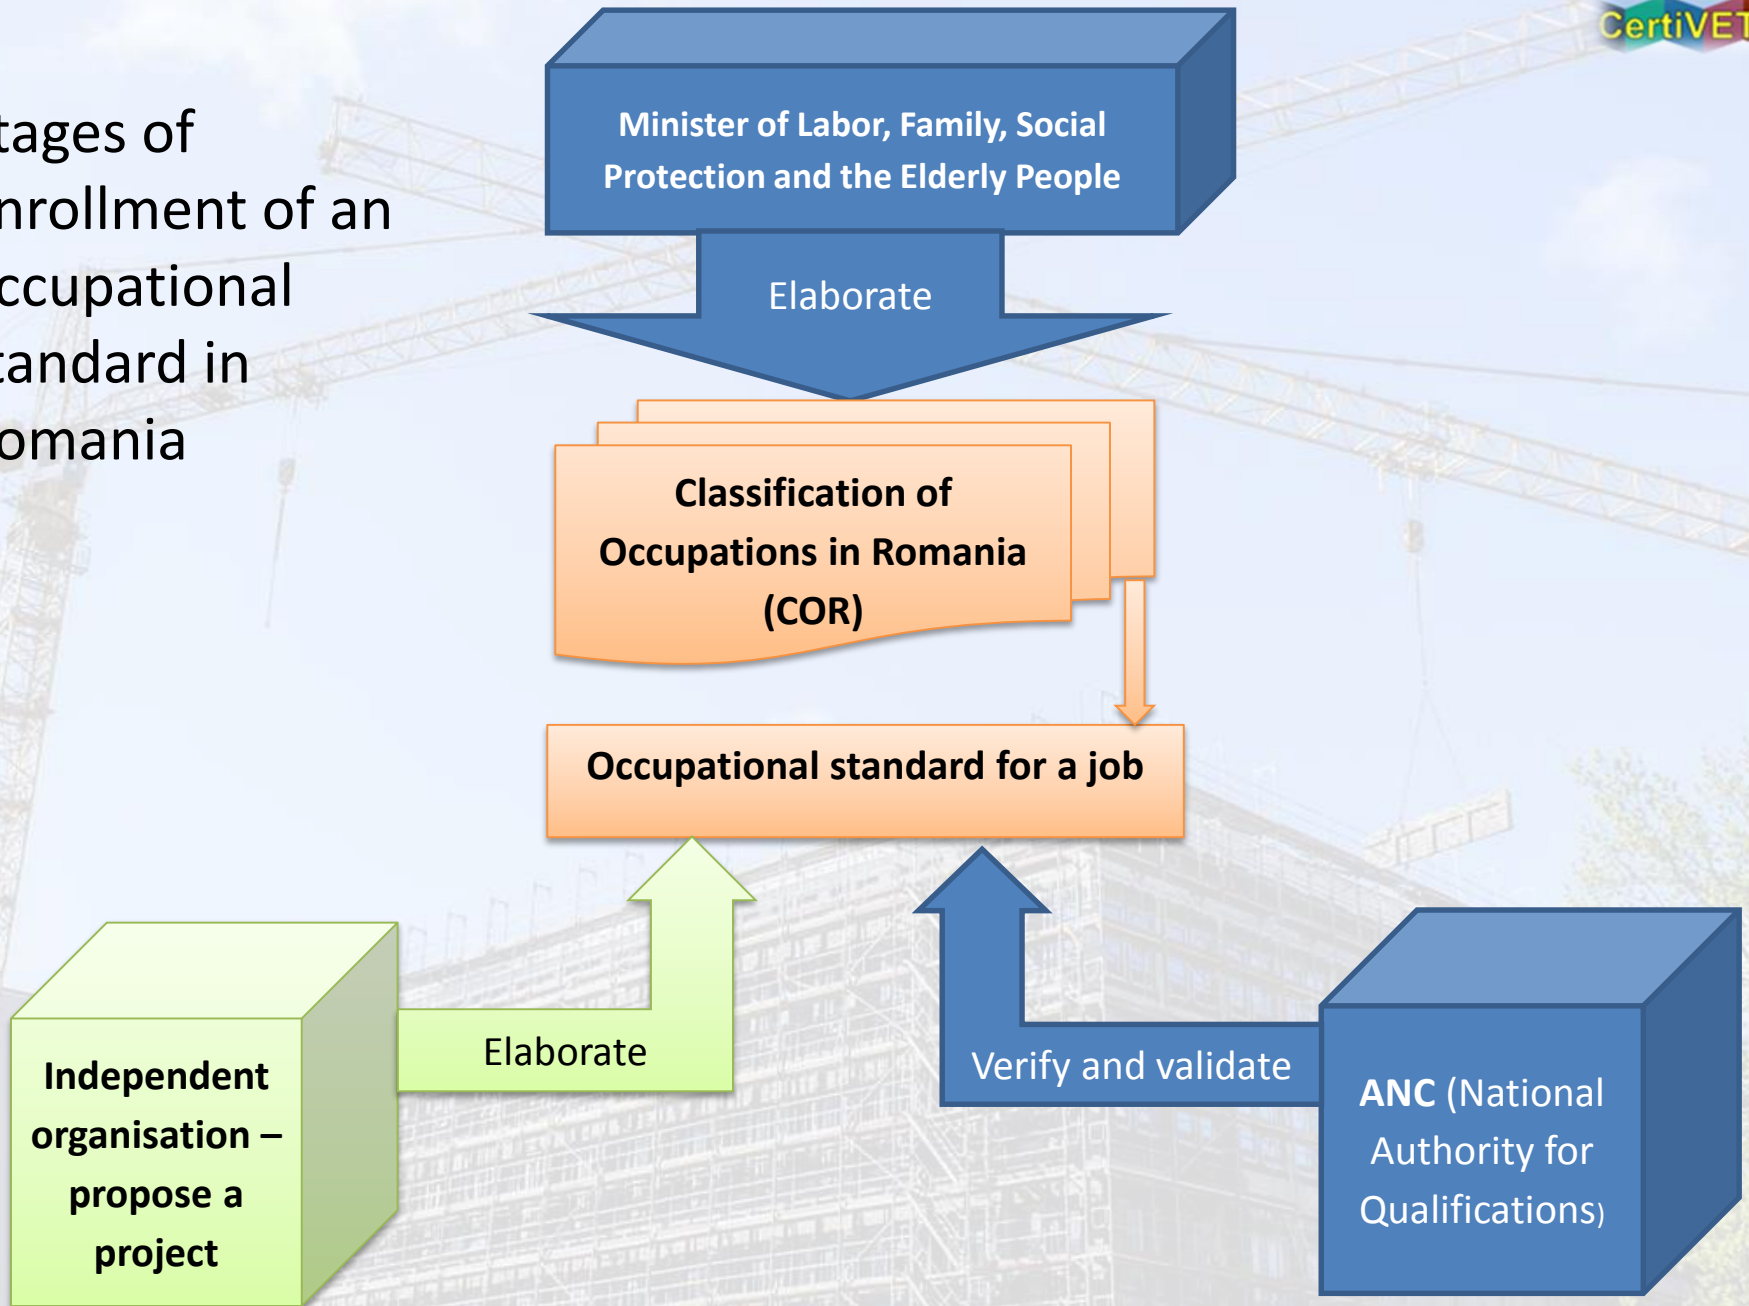

Adina Cocu, PhD, Universitatea Dunarea de Jos din Galati

Romanian organisms

- List with occupations - **Classification of Occupations (COR** – the Romanian name for **NQF** - national qualifications framework)
- **ANC - National Authority for Qualifications**
 - To develop a national standard for VET;
 - To authorize certification centres responsible with non-formal education and certification process;
 - To conduct together with certification centres the learning outcomes recognition through a national recognition process.

Stages of enrollment of an occupational standard in Romania

How to become a certified trainer

- A person who wishes to obtain a certification must follow several steps:
 - to enrol in a specialized course within a certification centre;
 - to attend classes;
 - to participate to an exam which check the learning outcomes and competences (theoretical and practical);

Conclusions

- VET trainer certification is different for public/private domain;
- Certification exam = ANC (National Authority for Qualifications) evaluation committee and examiners from certification centre.
- The certificate is accompanied by a descriptive summary:
 - occupation and type of certificate;
 - total number of hours (theoretical and practical);
 - a list of acquired professional competences.
